

m*modal™

MOBILE SOLUTIONS

Healthcare is fast-paced; physicians need tools that keep up with their demanding workloads. That includes the ability to capture the patient story anywhere, anytime. M*Modal Fluency Flex™ Mobile lets you do just that, and more.

M*MODAL FLUENCY FLEX™ MOBILE

A mobile solution to dictate important patient information straight from an iOS device, review audio recording, send to transcription, review transcribed document, edit/sign documents and more.

THE CHOICE IS YOURS

Enhance your M*Modal Fluency for Transcription™ platform by empowering your physicians to take control of their workflow.

M*Modal Fluency Flex Mobile is part of our integrated transcription solution that builds on M*Modal technology to deliver greater efficiency and ease to physician workflows. To support the natural and individual workflows of physicians, M*Modal Fluency Flex Mobile provides them with the capability for mobile document creation so they can focus on what matters most—patient care.

A distinct advantage of using M*Modal Fluency Flex Mobile is that it uses the same cloud-based M*Modal Speech Understanding™ technology powering all of our solutions. So you can easily and instantly use existing physician voice profiles for optimal accuracy. And there's no need to train the system—it already knows and recognizes your voice profile.

WHAT IS M*MODAL FLUENCY FLEX MOBILE?

An app for mobile dictation that enables physicians to:

- **Save time dictating patient demographic information by:**
 - Scanning the patient barcode sticker with camera.
 - Finding the right patient by name, Medical Record Number, and other fields.
 - Select patient from list generated by schedule interface with real-time updates when connected.
 - View patients in chronological order of their appointment and list view.
- **Get better transcription results with high quality audio.**
- **Utilize quick access dictation solution with easy-to-use recording and playback controls.**
- **Enjoy the flexibility of working when and where you want, including:**
 - Ability to dictate offline with dictation uploading automatically when network connectivity (LTE/3G or Wi-Fi) is restored.
 - Ability to suspend jobs for later review/resume/completion.
 - Enhanced document review, edit, and E-Sign of transcribed reports capabilities.
 - M*Modal Transcription Services priority service level support for rapid turnaround.
 - iPad® Optimization with support for both landscape and portrait modes.

SECURE VOICE DATA TRANSMISSION AND STORAGE

M*Modal Fluency Flex mobile applications allow dictations to be sent directly to the M*Modal Cloud server utilizing a secure HTTPS transmission, designed to meet HIPAA and HITECH security protocols.

When a connection is not available, dictations are encrypted and saved to the local device, then sent as soon as the connection is restored.

M*MODAL FLUENCY FLEX REQUIREMENTS

We support M*Modal Fluency Flex Mobile for devices running iOS v7.0 and above, including:

- iPhone 4S and newer
- iPad 2 and newer
- iPad mini 2 and newer
- iPod Touch (5th Gen and newer)

with a Wi-Fi connection. M*Modal Fluency Flex Mobile requires that the facility utilize the M*Modal Fluency For Transcription platform.
